1. Continuing operations

West Kirkland Mining Inc. (formerly Anthem Ventures Capital Corp.) ("West Kirkland" or the "Company") was incorporated on April 3, 2007, under the Company Act of the Province British Columbia, Canada. The Company was a capital pool corporation, and on May 28, 2010, completed its Qualifying transaction as that term is defined in TSX Venture Exchange Policy 2.4. The Company acquired all of the issued and outstanding shares of WK Mining Corp. ("WK Mining") (Note 3) which has been accounted for as a reverse take-over that does not constitute a business combination. As a result, these unaudited interim consolidated financial statements reflect the financial position, operating results and cash flows of the Company's legal subsidiary, WK Mining. As WK Mining was not incorporated until November 9, 2009, there is no comparative information to present.

The Company is an exploration company working on mineral properties it has staked or acquired by way of option agreement, principally in Ontario and Nevada. The Company has not yet determined whether these mineral properties contain any economically recoverable ore reserves. The Company defers all acquisition, exploration and development costs related to the properties on which it is conducting exploration. The recoverability of these amounts is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development of the interests, and future profitable production, or alternatively, upon the Company's ability to dispose of its interests on a profitable basis.

These financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which assume that the Company will realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses from inception and does not currently have any revenue generating operations. The Company's ability to continue as a going concern is dependent upon its ability in the future to achieve profitable operations and, in the meantime, to obtain the necessary financing to meet its obligations and repay its liabilities when they become due. External financing, predominantly by the issuance of equity to the public, will be sought to finance the operations of the Company. If the going concern assumption was not appropriate, the financial statements would require revision and restatement on a liquidation basis.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

2. Summary of significant accounting policies

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP") and include the following significant policies outlined below.

(a) *Principles of consolidation*

These interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary WK Mining (Note 3). All intercompany transactions and balances have been eliminated.

2. Summary of significant accounting policies (continued)

(b) *Measurement uncertainty*

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reported period. Significant estimates used in preparation of these financial statements include estimates of the net realizable value of mineral properties, deferred exploration costs and asset retirement obligations. Actual results may differ from those estimated.

(c) *Asset retirement obligations*

The Company records the present value of asset retirement obligations including reclamation costs when the obligation is incurred and it is recorded as a liability with a corresponding increase in the carrying value of the related mining assets. The carrying value is amortized over the life of the related mining asset on a units-of-production basis commencing with initial commercialization of the asset. The liability is accreted to the actual liability on settlement through charges each period in the statement of loss and comprehensive loss.

(d) *Financial instruments*

The Company follows the Canadian Institute of Chartered Accountants ("CICA") Section 3855, *Financial Instruments - Recognition and Measurement*, to account for its financial assets, liabilities and equity instruments. The Company has designated its cash as held-for-trading, and it is measured at fair value, with changes in fair value being recorded in net loss. Accounts receivable is classified as loans and receivables and is measured at amortized costs. Accounts payable and accrued liabilities are classified as other financial liabilities and are recorded at amortized cost. The Company had neither available for sale, nor held to maturity financial instruments for the period ended June 30, 2010.

The Company follows CICA Handbook Section 3862, *Financial Instruments - Disclosures*; Section 3863, *Financial Instruments - Presentation*; and Section 1535, *Capital Disclosures*.

CICA Section 3862, *Financial Instruments - Disclosures*, describes the disclosures related to the significance of financial instruments on the entity's financial position and performance and the nature and extent of risks arising for financial instruments to which the entity is exposed and how the entity manages those risks. CICA Section 3862 was amended in June 2009 to require disclosure about the inputs to fair value measurements, including their classification within a hierarchy that prioritizes the inputs to fair value measurement. The three levels of the fair value hierarchy are:

- Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 - Inputs that are not based on observable market data.

This amendment is effective for fiscal years ending after September 30, 2009. The Company does not have any financial instruments to which this amendment applies.

2. Summary of significant accounting policies (continued)

CICA Section 3863, *Financial Instruments - Presentation*, establishes standards for the presentation of financial instruments and non-financial derivatives. The disclosures required by these new standards are included in Note 7, "Financial risk management".

CICA Section 1535, *Capital Disclosures*, establishes standards for disclosing information about the entity's capital and how it is managed to enable users of financial statements to evaluate the entity's objectives, policies and procedures for managing capital. The Company has included these disclosures in Note 6, "Capital risk management".

(e) *Cash*

Cash consists of cash on hand.

(f) *Mineral rights and deferred exploration costs*

The Company is in the exploration stage with respect to its activities and accordingly follows the practice of capitalizing all costs relating to the acquisition, exploration and development of its mining rights and crediting all revenues received against the cost of the related interests. At such time as commercial production commences, these costs will be charged to operations on a units-of-production method based on proven and probable reserves. The carrying values related to abandoned interests are charged to operations at the time of any abandonment or in the case that they are determined to be impaired as discussed below.

Mineral rights include costs to acquire options to acquire interests in unproven mineral properties.

Management reviews the carrying value of mineral rights at least quarterly for evidence of impairment. This review is generally made with reference to the timing of exploration work, work programs proposed, exploration results achieved by the Company and by others in the related area of interest, and an assessment of the likely results to be achieved from performance of further exploration. When the results of this review indicate that a condition of impairment exists, the Company estimates the net recoverable amount of mining rights by reference to the potential for success of further exploration activity and/or the likely proceeds to be received from sale or assignment of the rights. When the carrying values of mining rights are estimated to exceed their net recoverable amounts, a provision is made for the decline in value.

(g) *Income taxes*

Future income taxes relate to the expected future tax consequences of differences between the carrying amount of balance sheet items and their corresponding tax values. Future tax assets, if any, are recognized only to the extent that, in the opinion of management, it is more likely than not that the future income tax assets will be realized. Future income tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of substantive enactment.

2. Summary of significant accounting policies (continued)

(h) *Foreign currency translation*

Monetary assets and liabilities denominated in foreign currencies are translated to the Canadian dollar equivalent at the rate of exchange at the balance sheet date. Purchases transacted in foreign currencies are translated to the Canadian dollar equivalent at the rate of exchange in effect at the time of the transaction. Foreign currency gains and losses are included in the statement of loss and comprehensive loss in the period in which they occur.

(i) *Stock-based compensation*

The fair value of all stock-based compensation and other stock-based payments are estimated using the Black-Scholes-Merton option valuation model and are recorded in the statement of loss and comprehensive loss over their vesting periods. The contributed surplus balance is reduced as the options are exercised and the amount initially recorded is transferred to share capital.

(j) *Recent accounting pronouncements*

(i) Business combinations

In January 2009, the CICA issued Section 1582, *Business Combinations*, Section 1601, *Consolidations*, and Section 1602, *Non-controlling Interest*. These new standards are harmonized with International Financial Reporting Standards ("IFRS"). Section 1582 specifies a number of changes, including: an expanded definition of a business, a requirement to measure all business acquisitions at fair value, a requirement to measure non-controlling interests at fair value, and a requirement to recognize acquisition-related costs as expenses. Section 1601 establishes the standards for preparing consolidated financial statements. Section 1602 specifies that non-controlling interests be treated as a separate component of equity, not as a liability or other item outside of equity. The new standards will become effective in 2011 but early adoption is permitted. The Company is evaluating the attributes of early adoption of this standard and its potential effects if events or transactions occurred that this standard applies to.

(ii) Convergence with International Financial Reporting Standards

In February 2008, the Accounting Standards Board confirmed that International Financial Reporting Standards (IFRS) will replace Canadian GAAP for publicly accountable enterprises for financial periods beginning on and after January 1, 2011. The Company's first mandatory filing under IFRS, which will be the first quarter of 2011, will contain IFRS-compliant information on a comparative basis, as well as reconciliations for that quarter and as at the January 1, 2010 transition date. Although IFRS uses a conceptual framework similar to Canadian GAAP, there are significant differences in recognition, measurement and disclosure. The Company has not yet fully determined the impact of the IFRS transition, if any, on the consolidated results. The Company is in the process of planning for IFRS convergence and has started the evaluation of the differences between IFRS and the Company's accounting policies and the assessment of the various alternatives available for first time adoption of IFRS.

3. Acquisition of WK Mining Corp.

On May 28, 2010, the Company acquired all the issued and outstanding shares of WK Mining. As consideration the Company issued 5,790,000 common shares of the Company to the shareholders of WK Mining.

The transaction was recorded as a reverse take-over that does not constitute a business combination. As a result, these interim consolidated financial statements reflect the financial position, operating results and cash flows of the legal subsidiary, WK Mining as at and for the period ended June 30, 2010. The operating results of the Company have been included commencing May 28, 2010. The number of common shares outstanding is those of the Company, the legal parent.

Under reverse takeover accounting, the issuance of the 5,790,000 common shares is deemed to have been issued by WK Mining for the net assets of the West Kirkland. The purchase cost and allocation of costs to the Company's assets and liabilities are as follows:

Net assets acquired at fair value:

Cash	\$	391,768
Accounts receivable		102,119
Mineral interests		22,071
Accounts payable and accrued liabilities		(486,052)
	\$	29,906

Consideration:

Share capital – issuance of 5,790,000 common shares	\$	29,906
	\$	29,906

Certain stock options granted by the Company on October 12, 2007, with an exercise price of \$0.20 and expiry date of October 12, 2012, have been revalued as at May 28, 2010. The fair value of these stock options was estimated using the Black-Scholes pricing model with the following assumptions:

Expected life	2.38 years
Risk-free interest rate	1.99%
Expected volatility ¹	40%
Expected dividends	\$Nil

¹As there is no trading history for the Company, the mining industry average for volatility was used.

The fair value of these options of \$75,330 has been charged to share capital.

(a) Goldstorm Property

In December 2009 the Company entered into an option agreement (the "Mexivada Agreement") with Mexivada Mining Corp. ("Mexivada") whereby the Company may acquire up to a 75% interest in the Goldstorm property covering approximately 4,080 acres of mineral rights near Elko, Nevada, USA. To earn an initial 56% under the option, the Company paid US\$100,000 in January 2010 and the issuance of 50,000 common shares of the Company on May 31, 2010 at a deemed cost of \$0.50 per common share. Further consideration consists of additional payments totaling US\$250,000 and 400,000 shares of the Company over a 48 month period from signing and a work commitment of US\$2,900,000 over 48 months from signing. The Company may earn an additional 19% interest in the property by spending a further US\$2,250,000 in work and paying a further 250,000 shares of the Company to the Vendors within 72 months of signing the agreement. The Mexivada Agreement contains an Area of Interest provision whereby if either party to this agreement shall stake or cause to be staked new mining claims within lines drawn parallel to and one mile from the boundaries of the current property, such properties shall be annexed and included into this agreement between the parties.

4. Mineral properties (continued)

In early May, 2010, in completing title due diligence on the Goldstorm property, it was discovered that title to an 800 acre section of Goldstorm property which was acquired through a lease, is subject to an exception whereby an undivided one-half interest of all oil, gas and minerals in or under the surface of said leased land was reserved by a Nevada corporation (the "Reserved Interest"). As a result, under an amendment to the Mexivada Agreement (the "Amendment"), which was agreed to on May 18, 2010, West Kirkland will retain its options to acquire up to a 75% interest in the Goldstorm property on the terms outlined above. However, the acquisition of an interest in the 800 acre section will be handled separately from West Kirkland's option to acquire an interest in the rest of the property from Mexivada. Pursuant to the Amendment, upon completion of the US\$75,000 cash payment to Mexivada on December 31, 2010, that forms a part of the option payments under the Mexivada Agreement, West Kirkland will earn a 50% interest in the leased lands. Under the Amendment, Mexivada is required to use all of its best efforts to establish the extinguishment or, otherwise acquire the Reserved Interest in order to satisfy the Company's right to acquire up to a 75% interest in the entire Goldstorm property.

The Company has also paid a US \$10,000 underlying lease payment on this property. On March 29, 2010 an additional 79 mining claims were staked by Mexivada within the Area of Interest and added to the option agreement. Also on March 29, 2010 an additional eight claims were staked outside the Area of Interest and are held 100% by West Kirkland. The complete Goldstorm property consists of 235 mineral claims and the leased land totaling 5,789.31 acres, (23.42 km²). Staking costs of \$37,242 have been paid. Total acquisition costs for the Goldstorm property total \$187,292. The Company has also incurred \$11,540 in legal fees relating to title opinion and title searches.

(b) *Cairo Property*

During November and December 2009 the Company staked three claim blocks comprised of 34 units in the Alma and Cairo Townships west of Kirkland Lake, Ontario, Canada. Costs of this staking totaled \$3,230.

(c) *Burteby Property*

In December 2009 the Company entered into an option agreement whereby the Company may acquire a 100% interest in mineral rights covering approximately 336 hectares in the Burt and Eby Townships west of Kirkland Lake, Ontario, Canada. As consideration for the option, the Company paid \$10,000 upon signing and is required to make additional payments totaling \$140,000 over a 48 month period from signing and a work commitment of \$200,000 over 36 months from signing. The vendors retain a 1.5% net smelter return royalty on the property, of which the Company may purchase two thirds (1.0%) for \$750,000.

(d) *Kenogami Property*

In December 2009 the Company entered into an option agreement whereby the Company may acquire a 100% interest in mineral rights covering approximately 450 hectares near Kenogami Lake west of Kirkland Lake, Ontario, Canada. The fair value of the options granted was estimated using the Black-Scholes model with the following weighted average assumptions:

Expected life	4.52 years
Risk-free interest rate	3.0%
Expected volatility ¹	40%
Expected dividends	-

¹As there is no trading history for the Company, the mining industry average for volatility was used.

As at June 30, 2010, the weighted average fair value per option outstanding was \$0.20.

	June 30, 2010	
	Number	Weighted average exercise price
Balance, January 1, 2010	-	-
Options re-valued (Note 3)	240,000	\$0.20
Granted	1,080,000	\$0.63
Balance, June 30, 2010	1,320,000	\$0.55

The weighted average remaining contractual life of the options outstanding at June 30, 2010, is 4.43 years.

(f) Per share amounts

The weighted average number of common shares outstanding is calculated based upon the following:

- The number of shares outstanding for the period from the beginning of the fiscal year to the date of the reverse takeover (Note 3) is deemed to be the number of shares issued by the Company to the shareholders of WK Mining; and
- For the period from the date of the reverse takeover to the end of the period, the number of shares outstanding would be the actual number of shares of the Company outstanding during this period.

For the three months and six months ended June 30, 2010 the weighted average number of common shares outstanding was 10,521,901 and 8,169,023 respectively. Exercise of all stock options and stock purchase warrants referred to in Note 5(e) and 5(c) are anti-dilutive for all periods presented.

6. Capital risk management

6. Capital risk management (continued)

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt and acquire or dispose of mineral rights.

As at June 30, 2010, the Company does not have any long-term debt and is not subject to any externally imposed capital requirements.

The Company expects its current capital resources will be sufficient to carry out its exploration and development plans and operations through its current operating period.

7. Financial risk management

The Company examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks.

(a) *Fair value*

As at June 30, 2010, the Company's financial instruments consist of cash, accounts receivable and accounts payable and accrued liabilities. Cash is stated at fair value. The fair values of accounts receivable and accounts payable and accrued liabilities approximate their carrying values due to the short-term nature of these instruments.

(b) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to short-term interest rate through the interest earned on cash balances; however, management does not believe this exposure is significant.

(c) *Credit risk*

Credit risk is the risk of financial loss to the Company if a customer fails to meet its contractual obligations. The Company is exposed to credit risk through its cash which is held in large Canadian financial institutions. The Company believes this credit risk is insignificant.

(d) *Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure.

Accounts payable and accrued liabilities are due within the current operating period.

8. Segmented information

The Company operates in one segment, being the exploration of mineral properties with two geographic locations: Ontario, Canada and Nevada, USA. The Company's mineral properties expenditures in Ontario, Canada totaled \$360,991 and in Nevada, USA totaled \$218,503. The Company's executive and head office is located in Vancouver, British Columbia, Canada.
