## Management's Discussion and Analysis For the period ended September 30, 2016

---

### Overview

West Kirkland Mining Inc. ("West Kirkland" or the "Company") is a mineral exploration and development company focused on the acquisition, exploration and development of gold projects in Nevada and Utah with its flagship asset being the Hasbrouck Project, which consists of the Hasbrouck and Three Hills properties. The Company is based in Vancouver, British Columbia, Canada and its common shares trade on the TSX Venture Exchange under the symbol, "WKM". The Company is a reporting issuer in the each of the provinces of Canada except Quebec.

The following Management Discussion and Analysis ("MD&A") focuses on the financial condition and results of operations of the Company for the period ended September 30, 2016. This MD&A is prepared as of November 23, 2016 and should be read in conjunction with the Company's condensed consolidated interim financial statements and related notes thereto for the period ended September 30, 2016.

The Company prepares its financial statements in accordance with International Financial Reporting Standards ("IFRS") and in accordance with International Accounting Standard 34 – *Interim Financial Reporting*. All dollar figures included therein and in the following discussion and analysis are quoted in Canadian dollars unless otherwise noted.

### Forward-Looking Information

Certain statements made and information contained herein may constitute "forward-looking statements" or "forward-looking information" within the meaning of applicable securities legislation (collectively, "Forward-Looking Statements"). Forward-Looking Statements are typically identified by words such as: believe, expect, anticipate, intend, estimate, postulate and similar expressions, or are those, which, by their nature, refer to future events. Forward-Looking Statements in this MD&A include, but are not limited to, statements with regard to:

- Planned exploration activity including both expected drilling and geological and geophysical related activities;
- Planned permitting activity for the Hasbrouck properties;
- Impact of increasing competition;
- Future foreign currency exchange rates;
- The Company's ability to obtain additional financing on satisfactory terms;
- Future sources of liquidity, cash flows and their uses; and

Forward-Looking Statements are necessarily based on a number of estimates and assumptions that, while considered reasonable by the Company based on the information available to it, are inherently subject to significant business, economic and competitive uncertainties and contingences. The Company cautions investors that any Forward-Looking Statements provided by the Company are not a guarantee of future results or performance, and that actual results may differ materially from those in Forward-Looking Statements as a result of various estimates, assumptions, risks, and uncertainties, including, but not limited to, the state of the financial markets for the Company's equity securities, the state of the market for gold or other minerals that may be produced generally, recent market volatility; variations in the nature, quality and quantity of any mineral deposits that may be located, the Company's ability to obtain any necessary permits, consents or authorizations required for its activities, to raise the necessary capital or to be fully able to implement its business strategies and other risks associated with the exploration and development of mineral properties.

Although the Company has attempted to identify risks and uncertainties (section 10) that may cause actual actions, events or results to differ materially from those described in Forward-Looking Statements, there may be other factors that cause actual results, performances, achievements or events to not be as anticipated, estimated or intended. Also, many of the factors are beyond the Company's control. As actual results and future events could differ materially from those anticipated in Forward-Looking Statements, readers should not place undue reliance on such statements. Except as may be required by law, the

# West Kirkland Mining Inc.

## Management's Discussion and Analysis For the period ended September 30, 2016

---

Company undertakes no obligation to publicly update or revise any Forward-Looking Statements, whether as a result of new information, future events or otherwise.

### Recent Activities in the Company

On October 28, 2016, the Company closed a private placement for 16,500,000 common shares at a price of \$0.10 per share for aggregate gross proceeds of \$1,650,000. There were no finder's fees or commissions paid on the private placement, which was arranged by management with the Company's major shareholders. Following the Private Placement Sun Valley Gold Master Fund, Ltd. and Ruffer LLP, on behalf of its clients, will hold 33.19% and 16.84% respectively of the common shares of the Company.

On September 1, 2016, the Company announced the results of the Hasbrouck Updated Pre-Feasibility Study ("2016 PFS"). The 2016 PFS updates the earlier July 2015 pre-feasibility study (the "2015 PFS") with value engineering, detailed scheduling, revised contractor cost estimates, an updated gold price and various other changes.

Highlights of the 2016 PFS included a US\$120 million after-tax Net Present Value ("NPV") at a 5% discount rate with a 43% after-tax Internal Rate of Return ("IRR"), assuming a gold price of US\$1,275 per ounce and a silver price of US\$18.21 per ounce. Initial capital required according to the 2016 PFS amounted to US\$47 million. All values are based on 100% of the project.

The 2016 PFS includes a timeline showing the Three Hills Mine operating for approximately two years followed by six years of operations at the Hasbrouck Mine to produce 594,000 gold equivalent ounces over eight years. The life of mine stripping ratio is modeled at 1.1:1. Adjusted operating costs for the project are estimated to be US\$661 per ounce of gold, with all-in sustaining costs of US\$709 per ounce of gold.

In December 2015, the Company closed a non-brokered private placement of 14,000,000 shares at a price \$0.05 per share for gross proceeds of \$700,000. Total share issuance costs were \$29,660.

On November 27, 2015, the Company announced the receipt of a federal Decision Record and Finding of No Significant Impact for the environmental assessment ("EA") of the Three Hills Mine located approximately one mile west of Tonopah in Esmeralda County, Nevada. The receipt of the Decision Record signifies completion of the National Environmental Policy Act and EA process, and is the final federal permit for construction to begin. The last required state permit for construction and operation was issued in June, 2016

The Company continues to advance permitting at the Hasbrouck Mine, advance value engineering of the Hasbrouck Project, and develop exploration opportunities. The Company is also evaluating other opportunities with synergistic operations, management or market circumstances.

### Discussion of Operations and Financial Results

#### 1. Results of Operations

##### *For the 9 month period ended September 30, 2016*

For the period ended September 30, 2016, the Company incurred a net loss of \$940,389 (September 30, 2015 - \$967,319) with cash expenditures materially lower in the current period when share-based compensation expenses of \$248,072 (September 30, 2015 - \$2,598) are removed from the current nine-month period. The overall reduction in expenditures is due to reduced activity and cost saving measures by the Company during the current nine-month period. Professional fees totaled \$176,753 (September 30, 2015 - \$279,354) due to decreased legal fees in the current period. Salaries totaled \$134,518 (September 30, 2015 - \$230,612) due to a reduction in staff during the current period as compared to the previous comparable period. Interest income totalled \$1,530 in the current period (September 30, 2015 - \$12,678) with the drop due to decreased cash on hand as compared to the prior comparative period.

# West Kirkland Mining Inc.

## Management's Discussion and Analysis For the period ended September 30, 2016

### For the quarter ended September 30, 2016

For the quarter ended September 30, 2016, the Company incurred a net loss of \$264,000 (September 30, 2015 \$229,429). Salaries totaled \$24,264 (September 30, 2015 - \$65,217) with the decrease due to staff reductions in the current period. Professional fees of \$84,533 (September 30, 2015 - \$48,646) and are higher than the comparative period in the prior year due to increased accounting and legal fees incurred in the current period.

### Selected Information

The following tables set forth selected financial data from the Company's consolidated financial statements and should be read in conjunction with those financial statements:

	Three Months Ended September 30, 2016	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2016	Nine Months Ended September 30, 2015
Interest Income	627	1,920	1,530	12,678
Comprehensive (Income) Loss	(321,769)	(2,199,450)	3,030,248	\$ (3,843,688)
Basic and Diluted Loss per Share	\$ 0.00	\$ 0.00	\$ 0.00	\$ 0.00
Total Assets	\$ 38,837,527	\$ 39,242,864	\$ 38,837,527	\$ 39,242,864
Long Term Debt	\$ Nil	\$ Nil	\$ Nil	\$ Nil
Dividends	\$ Nil	\$ Nil	\$ Nil	\$ Nil

The following table sets forth selected quarterly financial information for each of the last eight (8) quarters:

Quarter Ending	Interest & Other Income	Net Loss	Comprehensive Loss (Gain) <sup>(1)</sup>	Net Basic Loss per Share
September 30, 2016	\$ 627	\$ 264,000	\$ (321,769)	\$ 0.00
June 30, 2016	\$ 787	\$ 465,071	\$ 668,430	\$ 0.00
March 31, 2016	\$ 116	\$ 211,318	\$ 2,683,587	\$ 0.00
December 31, 2015	\$ -	\$ 171,957	\$ (1,263,606)	\$ 0.00
September 30, 2015	\$ 1,920	\$ 229,428	\$ (2,199,450)	\$ 0.00
June 30, 2015	\$ 3,912	\$ 444,237	\$ 915,262	\$ 0.00
March 31, 2015	\$ 6,846	\$ 293,654	\$ (2,559,501)	\$ 0.00
December 31, 2014	\$ 12,395	\$ 1,944,024	\$ 964,159	\$ 0.00

#### Notes:

- Quarterly net Loss is often materially affected by the timing and recognition of large non-cash income, expenses or write-offs.
- Comprehensive (gain) loss by quarter is often materially affected by changes in foreign exchange rates.

## 2. Exploration Programs and Expenditures

For more detailed information regarding the Company's mineral properties please refer to note 5, "Mineral Properties" in the Company's interim condensed consolidated financial statements for the period ended September 30, 2016. As of September 30, 2016, total accumulated exploration and evaluation expenditures for each mineral property are summarized as follows:

# West Kirkland Mining Inc.

## Management's Discussion and Analysis For the period ended September 30, 2016

Resource Property	Balance 31-Dec-14	Additions 2015	Foreign Exchange	Balance 31-Dec-15	Additions 2016	Foreign Exchange	Balance 30-Sep-16
Hasbrouck	\$ 3,789,166	\$ 2,639,939	\$ 731,352	\$ 7,160,457	\$ 556,875	\$ (374,061)	\$ 7,343,271
TUG	3,692,359	86,387	712,627	4,491,373	3,367	(234,626)	4,260,113
Total	\$ 7,481,525	\$ 2,726,326	\$ 1,443,979	\$ 11,651,830	\$ 560,242	\$ (608,687)	\$ 11,603,384

### *Hasbrouck and Three Hills*

On January 24, 2014, the Company entered into a purchase agreement to acquire the Hasbrouck and Three Hills properties in southwestern Nevada for consideration of up to US\$30 million from Allied Nevada Gold Corp. ("ANV"). A US\$0.5 million non-refundable cash deposit was paid to ANV upon execution of the purchase agreement. A further US\$19.5 million cash payment was paid on April 23, 2014, at which time the Company acquired a 75% interest in the properties. The Company had the option to acquire the remaining 25% interest in the properties by paying an additional US\$10 million to ANV by October 23, 2016 in accordance with the terms and conditions of the purchase agreement. The Company did not exercise the option.

On March 10, 2015, ANV announced that it had filed for Chapter 11 bankruptcy protection in the U.S. and was implementing a financial restructuring of its debt. On June 19, 2015, Waterton Precious Metals Fund II Cayman, LP ("Waterton") acquired all of ANV's exploration properties and related assets (excluding the Hycroft operation) for US\$17.5 million. The bankruptcy of ANV and the subsequent acquisition of the 25% interest in the Hasbrouck project by Waterton does not alter the Company's legal rights or interests in the Hasbrouck Project and the Company continues to hold title to the properties.

As outlined in the purchase agreement, 100% title to the mineral rights underlying the Hasbrouck project has been transferred into a Limited Liability Corporation (the "LLC") for ownership and operating purposes. Upon the execution of a formal operating agreement, the Company will transfer a 25% interest in the LLC to Waterton and retain the remaining 75% interest. Waterton has indicated they will fund their 25% share of expenditures on the property going forward.

The Company has advanced the properties to a pre-feasibility study level. Since acquiring its 75% interest in the Hasbrouck properties in April 2014 the Company has conducted exploration and condemnation drilling, geotechnical and hydrological investigations and metallurgical studies. Pre-feasibility engineering and modelling as well as permitting activities continued into 2016, culminating with the completion of the 2016 PFS as announced September 1, 2016 and filed September 15, 2016 on SEDAR.

### Three Hills Permitting Update

On November 27, 2015, the Company announced the receipt of a Decision Record and Finding of No Significant Impact for the EA at the Three Hills Mine. The receipt of the Decision Record signifies completion of the National Environmental Policy Act and EA process, and is the final major permitting step for construction to begin. The last required state permit for construction and operation was issued in June, 2016.

Three Hills qualified under an EA because of its small footprint of less than a square mile and the absence of "significant impacts" as determined by the Bureau of Land Management. West Kirkland plans to operate the Three Hills Mine for at least two years, allowing time to permit and build the Hasbrouck Mine. Hasbrouck Mine's capital costs are projected to be significantly funded by cash flow from the Three Hills Mine. The possibility exists that the ore body at Three Hills can be extended through exploration while the mine is in construction and operation, which would generate additional cash flow in order to reduce peak funding requirements on the Hasbrouck Mine and allow more time for permitting.

# West Kirkland Mining Inc.

## Management's Discussion and Analysis For the period ended September 30, 2016

---

### Hasbrouck Permitting Update

The mine plan for Hasbrouck, as outlined in the 2016 PFS, will require a typical amount of permitting for a mining operation in Nevada, including the completion of an environmental impact study. There appear to be no biological, cultural, hydrology, or geochemistry issues that would delay or disrupt the timely process of applications and permitting for development. The two mines are scheduled sequentially which will allow 24 months during Three Hills Mine construction and operation for the acquisition of permits for the Hasbrouck Mine. This is considered sufficient time, given the straightforward nature of the Hasbrouck Mine, but the time required to obtain permits is outside of the Company's control. The Company has continued work towards the completion of permitting at Hasbrouck during 2016 in advance of the completion of project financing and the commencement of construction at Three Hills, potentially reducing the time gap between the commencement of production at Three Hills versus the completion of permitting at Hasbrouck. Should permitting at Hasbrouck take longer than 24 months after the commencement of construction at Three Hills to obtain, construction at Hasbrouck could simply be deferred until they are in hand.

### Hasbrouck Updated Pre-feasibility Study

The Hasbrouck project's base case, as reported in the 2016 PFS, has an after-tax IRR of 43% and a US\$120 million after-tax NPV at a 5% discount rate (NPV 5%) assuming a US\$1,275/oz gold price and a US\$18.21/oz silver price (all figures are based on 100% of the project). Processing is planned at an average 6.1 million ore tons per year for 74,000 ounces annual gold production for eight years.

In the 2016 PFS base case a Carbon-In-Columns ("CIC") plant will be installed at the Three Hills. Gold will be stripped from carbon off-site by a contractor. An Adsorption-Desorption-Recovery plant (ADR) complete with CIC will be installed at the Hasbrouck to handle the greater amount of silver at that mine site.

Initial capital expenditures to construct the Three Hills Mine are estimated at \$47 million. Further capital expenditures of \$83.0 million to construct the larger Hasbrouck Mine are modelled to come from free cashflow from operations at the Three Hills Mine.

The 2016 PFS includes a timeline showing the Three Hills Mine operating for approximately two years followed by six years of operations at the Hasbrouck Mine to produce 594,000 equivalent gold ounces over eight years. The life of mine stripping ratio is modeled at 1.1:1. Adjusted operating costs for the project are predicted to be US\$661 per ounce of gold, with all-in sustaining costs of US\$709 per ounce of gold.

Three Hills is planned as a run-of-mine heap leach operation using conventional open pit, truck-and-shovel mining. Run-of-mine material is to be placed on the leach pad at up to 15,000 tons per day. A large-scale metallurgical test on un-crushed material predicts 81.5% gold recovery and silver recovery of 11%.

The Hasbrouck Mine is designed as a 17,500 ton-per-day heap-leach operation. Crushing is designed to be by a primary jaw crusher, two secondary cone crushers, and a tertiary high pressure grinding roll (HPGR). The crushed product is to be agglomerated with cement in a pug mill and conveyed to a leach pad. Metallurgical tests of Hasbrouck ore in a lab-scale HPGR predict that using this machine for tertiary crushing should result in a gold recovery of 74% and silver recovery of 11%. Gold, and silver in the case of Hasbrouck, is to be leached using industry standard solutions which will be passed through carbon columns to extract the precious metals.

The 2016 PFS National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101") compliant technical report was filed on SEDAR on September 15, 2016. The filed report is entitled "Technical Report and Updated Preliminary Feasibility Study: Hasbrouck and Three Hills Gold-Silver Project, Esmeralda County, Nevada," is dated September 14, 2016 and was prepared by Thomas L. Dyer, P.E. and Paul Tietz, C.P.G. of Mine Development Associates ("MDA") of Reno, Nevada, who are WKM's Independent Qualified Persons as defined under NI 43-101. A copy of the report can be found at [www.sedar.com](http://www.sedar.com) and on the Company's website. This latest technical report is an update to the earlier 2015 PFS technical report dated effective June 19, 2015, which was prepared by the same Qualified Persons as the 2016 PFS. Mineral resource and reserve estimates have not changed since June 19, 2015.

# West Kirkland Mining Inc.

## Management's Discussion and Analysis For the period ended September 30, 2016

Exploration for extending the potential mine life at Three Hills is to be conducted once cash flow is established. The Three Hills and Hasbrouck deposits are located within a large land position with near surface gold intercepts that are proximal to, and not presently included, in the resource models. These intercepts are viable exploration targets, drilling of which is planned after achieving initial production.

### Hasbrouck Project Resources

No change to Mineral Resources or Reserves has occurred since the 2015 PFS. Resources reported below are as at November 3, 2014 and are inclusive of reserves and are based on 100% of the project.

<b>Hasbrouck Deposit Reported Mineral Resources* November 3, 2014, Mine Development Associates (0.006oz AuEq/ton Cutoff)</b>					
<b>Class</b>	<b>Tons</b>	<b>oz Au/ton</b>	<b>oz Au</b>	<b>oz Ag/ton</b>	<b>oz Ag</b>
Measured	8,261,000	0.017	143,000	0.357	2,949,000
Indicated	45,924,000	0.013	595,000	0.243	11,147,000
M+I	54,185,000	0.014	738,000	0.260	14,096,000
Inferred	11,772,000	0.009	104,000	0.191	2,249,000
Notes: oz AuEq/ton = oz Au/ton + (oz Ag/ton x 0.000417)					

<b>Three Hills Reported Mineral Resources* August 4, 2014, Mine Development Associates (0.005oz Au/ton Cutoff)</b>			
<b>Class</b>	<b>Tons</b>	<b>oz Au/ton</b>	<b>oz Au</b>
Indicated	10,897,000	0.017	189,000
Inferred	2,568,000	0.013	32,000

### **Notes:**

- CIM definitions are followed for classification of Mineral Resources.
- Mineral Resources are estimated using a gold price of US\$1,300 per oz and a silver price of US\$22 per oz.
- Totals may not represent the sum of the parts due to rounding.
- The Mineral Resources have been prepared by Paul Tietz, C.P.G of Mine Development Associates in conformity with CIM "Estimation of Mineral Resource and Mineral Reserves Best Practices" guidelines and are reported in accordance with the Canadian Securities Administrators NI43-101. Mineral resources are not mineral reserves and do not have demonstrated economic viability. There is no certainty that all mineral resource will be converted into mineral reserve.

### Hasbrouck Project Reserves

The 2015 PFS, Mineral Resource Estimate and Reserves were prepared in conformance with NI 43-101 by MDA. Proven and Probable reserves (based on 100% of the project) total 45.3 million tons containing 762,000 ounces gold and 10.6 million ounces silver as detailed below:

# West Kirkland Mining Inc.

## Management's Discussion and Analysis For the period ended September 30, 2016

Hasbrouck Project Reserves*, June 3, 2015, Mine Development Associates <sup>(1, 2)</sup>						
Three Hills		K tons	Grade (oz Au/ ton)	K oz Au	oz Ag/ton	K oz Ag
0.005 opt Au cutoff	Proven	-	-	-	-	-
	Probable	9,653	0.018	175	-	-
	P&P	9,653	0.018	175	-	-
<b>Hasbrouck</b>						
Variable <sup>(3)</sup>	Proven	6,242	0.020	127	0.410	2,562
	Probable	29,374	0.016	461	0.273	8,007
	P&P	35,617	0.017	588	0.297	10,569
<b>Total Hasbrouck Project</b>						
Variable <sup>(3)</sup>	Proven	6,242	0.020	127	0.410	2,562
	Probable	39,028	0.016	635	0.205	8,007
	P&P	45,270	0.017	762	0.233	10,569

### Notes:

1. The estimation and classification of Proven and Probable reserves have been prepared by Thomas L. Dyer, P.E., of Mine Development Associates following CIM standards.
2. Reserves are estimated based on \$1,225/oz gold and \$17.50/oz silver.
3. Cutoff grades used for reserves are: Three Hills 0.005 oz Au/ton, Hasbrouck Upper Siebert 0.008 oz Au/ton, and Hasbrouck Lower Siebert 0.007 oz Au/ton.
4. It is MDA's opinion that the sampling, assaying, and security procedures used at Three Hills and Hasbrouck follow industry standard procedures, and are adequate for the estimation of the current mineral reserves.
5. MDA completed audits of the database, performed a site visit, reviewed QAQC data and confirmed historic assays. After performing their review, they consider the assay data to be adequate for the estimation of the current mineral reserves.
6. MDA has reviewed and verified the data disclosed in the above table to be in conformity with generally accepted CIM "Estimation of Mineral Resource and Mineral Reserves Best Practices" guidelines in accordance with NI 43-101.

### **Fronteer, Nevada Property Option**

On December 14, 2010, the Company entered an agreement with Fronteer Gold Inc. ("Fronteer") to option 11 properties comprising approximately 234 km<sup>2</sup> in north-eastern Nevada and Utah. On February 3, 2011 Fronteer was acquired by Newmont Mining Corporation ("Newmont"). The acquisition of Fronteer had no effect on the agreement with the Company. Under the agreement the Company had the option of earning a 60% interest on any of the properties by spending an aggregate \$4,000,000 over two years or completing a pre-feasibility study on any designated property. The Company completed sufficient work to earn a 60% interest in the TUG property. The Company did not earn or retain interests in any other of the Fronteer properties and rights to all such properties except TUG were relinquished in 2013.

### TUG

The TUG deposit is exposed or near-surface for the most part and is shallow dipping, making it a suitable target for open pit mining methods. An NI 43-101 PEA technical report was completed by Roscoe Postle Associates Inc. The study predicted a 26% after-tax IRR and a US\$9 million NPV(8%) at US\$1,525 gold/US\$28 silver and an in-pit indicated resource of 114,000 ounces gold plus 5.4 million ounces silver with an inferred resource of 3,000 ounces gold plus 298,000 ounces of silver.

# West Kirkland Mining Inc.

## Management's Discussion and Analysis For the period ended September 30, 2016

In the future, the Company will need to complete negotiations for a Joint Venture arrangement with Newmont to establish the operational and management framework for the TUG property. The Company will be the manager and project operator of the Joint Venture. The Company as the project operator would have the right to determine programs and expenditures. A technical steering committee comprised of members from Newmont and West Kirkland would be established so that the project may benefit from the collective knowledge and expertise of both companies. Given current gold prices and the Company's focus on the Hasbrouck Project, the carrying value of the TUG property was written down to \$3.7 million in 2014.

### 3. Liquidity and Capital Resources

In November 2016, the Company closed a non-brokered private placement of 16,500,000 shares at a price \$0.10 per share for gross proceeds of \$1,650,000.

The financial statements are prepared on the basis of a going concern which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. If the Company was unable to continue as a going concern, there would be changes in the carrying amounts of assets and liabilities and the statement of financial position classifications used.

### 4. Off Balance Sheet Arrangements

The Company does not have any special purpose entities nor is it party to any arrangements that would be excluded from the balance sheet.

### 5. Transactions with Related Parties

The Company paid remuneration for the following items with companies related by way of directors in common:

	3 months ended September 30, 2016	3 months ended September 30, 2015	9 months ended September 30, 2016	9 months ended September 30, 2015
Administration fees	\$ 6,000	\$ 10,500	\$ 18,000	\$ 31,500
Professional fees	12,000	15,000	36,000	45,000
Rent	6,300	13,607	18,900	40,821
Directors Fees	27,250	26,750	88,750	92,250
Total Related Party Transactions	\$ 51,550	\$ 65,857	\$ 161,650	\$ 209,571

For the period ended September 30, 2016, the Company accrued or paid \$18,000 (September 30, 2015 - \$31,500) for day-to-day administration, reception and secretarial services and \$36,000 (September 30, 2015 - \$45,000) for accounting services; and \$18,900 (September 30, 2015 - \$40,821) for rent to Platinum Group Metals Ltd., a company related by virtue of common directors and officers. Amounts payable at period end include an amount of \$39,054 to Platinum Group Metals (September 30, 2015 - \$42,169).

These transactions are in the normal course of operations and are measured at the exchange amount of consideration established and agreed to by the parties.

### 6. Proposed Transactions

As is typical of the mineral exploration and development industry, the Company periodically reviews potential merger, acquisition, investment, joint venture and other opportunities that could enhance shareholder value.

### 7. Critical Accounting Estimates

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements, and the reported amounts of revenues and expenditures during the reporting period. Management has identified (i) mineral property acquisition and deferred exploration costs (ii) provision for environmental reclamation and closure costs, (iii) deferred tax provision (iv) share-based compensation and (v) recoverability of its interest in mineral properties as the main estimates for the following discussion. Please refer to Note 2 of the Company's 2015 audited annual consolidated financial statements for a description of the significant accounting policies and critical accounting estimates.

Under IFRS, the Company defers all costs relating to the acquisition and exploration of its mineral properties. Any revenues received from such properties are credited against the costs of the property. When commercial production commences on any of the Company's properties, any previously capitalized costs would be charged to operations using a unit-of-production method. The Company reviews the carrying value of its mineral properties for recoverability when events or changes in circumstances indicate that the properties may be impaired. If such a condition exists and the carrying value of a property exceeds the estimated net recoverable amount, provision is made for impairment in value.

The existence of uncertainties during the exploration stage and the lack of definitive empirical evidence with respect to the feasibility of successful commercial development of any exploration property does create measurement uncertainty concerning the estimate of the amount of impairment and related fair value of any mineral property. The Company relies on its own or independent estimates of further geological prospects of a particular property and also considers the likely proceeds from a sale or assignment of the rights before determining whether or not impairment in value has occurred.

Environmental reclamation and closure costs have been estimated based on the Company's interpretation of current regulatory requirements, however changes in regulatory requirements and new information may result in revisions to estimates. The Company recognizes the fair value of liabilities for reclamation and closure costs in the period in which they are incurred. A corresponding increase to the carrying amount of the related assets is generally recorded and depreciated over the life of the asset.

The deferred tax provision is based on the liability method. Future taxes arise from the recognition of the tax consequences of temporary differences by applying enacted or substantively enacted tax rates applicable to future years to differences between the financial statement carrying amounts and the tax bases of certain assets and liabilities. The Company does not recognize any deferred tax assets unless it is probable that the deferred tax amount will be realized in the foreseeable future.

### 8. Changes in Accounting Policies

The accounting policies applied in preparation of the consolidated financial statements are consistent with those applied and disclosed in the Company's consolidated financial statements for the year ended December 31, 2015. There were no changes to the Company's accounting policies during the nine months ended September 30, 2016

### 9. Financial Instruments and Other Instruments

The Company has designated its cash as loans and receivables, and it is measured at cost which approximates fair value. Accounts receivable are classified as loans and receivables and are measured at amortized cost. Reclamation bonds are classified as held to maturity and are measured at amortized cost, adjusted for current exchange rates. Trades payable and other liabilities are classified as other financial liabilities and are recorded at amortized cost. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from financial instruments. The fair value of these financial instruments approximates their carrying value due to their capacity for prompt liquidation.

### 10. Risks and Uncertainties

The Company's securities should be considered a highly speculative investment and investors should carefully consider all of the information disclosed in the Company's Canadian regulatory filings prior to making an investment in the Company. For a discussion of risk factors applicable to the Company, see the section entitled "Risk Factors" in the Company's most recent annual information form filed with the Canadian provincial securities regulators.

Without limiting the foregoing, the most significant risks and uncertainties faced by the Company are: the inherent risk associated with mineral exploration and development activities; the uncertainty of mineral resources and their development into mineable reserves; uncertainty as to potential project delays from circumstances beyond the Company's control; as well as title risks; political risks; risks associated with fluctuations in foreign exchange rates; risks associated with fluctuations in metal prices; risks associated with the possible failure to obtain mining licenses and/or obtain the capital required for project and mine development.

### 11. Disclosure on Internal Controls

Management has established processes to provide them sufficient knowledge to support representations that they have exercised reasonable diligence that (i) the consolidated financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the audited financial statements; and (ii) the consolidated financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the periods presented.

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109"), this Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of: i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's accounting policies.

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

### 12. Outstanding Share Data

The Company has an unlimited number of common shares authorized for issuance without par value. At September 30, 2016, there were 308,134,169 common shares outstanding, 10,650,000 incentive share options outstanding and 220,940,833 common share purchase warrants outstanding. At November 23, 2016, there were 324,634,169 common shares, 10,600,000 incentive share options and 220,940,833 share purchase warrants outstanding. During the period and subsequent to period end the Company made no changes to the exercise price of outstanding options through cancellation and reissuance or otherwise.

### 13. Outlook

The Company has been focusing its efforts and resources on the engineering, permitting, development and operation of the Hasbrouck Project. The Company plans to continue with the required permitting and the determination of final project configuration for the larger Hasbrouck pit, at the same time as considering construction financing alternatives. The Three Hills property is now fully permitted.

The Three Hills and Hasbrouck deposits are 8 kilometers apart and located within a large land position hosting several promising gold intercepts. Known gold intercepts are located proximal to current resources; these are not included in the resource model. These intercepts present exploration targets with the potential to increase and extend known resources. Detailed drill planning in 3 dimensions with the objectives of adding to resources proximal to the current reserves is in progress, at the time of writing.

The Company has proactively taken steps to lower its overhead and staff costs to conserve working capital. The Company plans to conserve cash while only utilizing working capital where necessary to achieve its short-term objectives, after which additional equity and/or debt financing will be required to advance its projects.

On November 27, 2015, the Company announced the receipt of a Decision Record and Finding of No Significant Impact for the EA of the Three Hills Mine. The receipt of the Decision Record signifies completion of the National Environmental Policy Act and EA process, and is the final federal permit required to allow construction to begin. The last required state permit for construction and operation was issued in June, 2016.

The possibility exists that the ore body at Three Hills can be extended through exploration while the mine is in construction and operation. This would generate additional cash flow which would reduce modelled peak funding requirements for the Hasbrouck Mine and allow more time for permitting the Hasbrouck Mine. Interest from third parties in the Company's properties has increased during the past several months coincident with rising gold prices.

The Company has undertaken a strategic review process lead by Cormark Securities to consider mergers or acquisitions to improve shareholder value or achieve synergies.

### Additional Information

Additional information relating to the Company can also be found on SEDAR.

### Approval

The Board of Directors of West Kirkland Mining Inc. has approved the disclosure contained in this MD&A. A copy of this MD&A will be provided to anyone who requests it.
