

**WEST KIRKLAND FILES HASBROUCK PROJECT TECHNICAL REPORT AND
UPDATED PRE-FEASIBILITY STUDY**

VANCOUVER, BRITISH COLUMBIA, September 15, 2016 – West Kirkland Mining Inc. (WKM:TSXV) reports that further to its news release dated September 1, 2016 announcing the results of an independent pre-feasibility study for the Hasbrouck and Three Hills deposits, it has today filed on SEDAR the associated National Instrument 43-101 Standards of Disclosure for Mineral Projects (“NI 43-101”) compliant technical report.

The filed report, entitled “Technical Report and Updated Preliminary Feasibility Study: Hasbrouck and Three Hills Gold-Silver Project, Esmeralda County, Nevada,” is dated September 14, 2016 and was prepared by Thomas L. Dyer, P.E. and Paul Tietz, C.P.G. of Mine Development Associates (MDA). A copy of the report can be found at www.sedar.com and on the Company’s website. This latest technical report is an update to an earlier pre-feasibility study dated effective June 19, 2015, which was prepared by the same Qualified Persons as the updated pre-feasibility study dated September 14, 2016. Mineral resource and reserve estimates have not changed since June 19, 2015.

About West Kirkland Mining Inc.

West Kirkland owns a 75% interest in the Hasbrouck Gold Project in Tonopah, Nevada. A completed Pre-Feasibility Study and Environmental Assessment with construction level drawings for the Three Hills Mine provides a shovel-ready gold project. West Kirkland also holds a 60% interest in the open pit heap-leach TUG Gold Project in Utah in Joint Venture with Newmont.

Disclaimer for Forward-Looking Information

This press release contains forward-looking information or forward-looking statements (collectively “forward-looking information”) within the meaning of applicable securities laws. Forward-looking information is typically identified by words such as: “believe”, “expect”, “anticipate”, “intend”, “estimate”, “postulate” and similar expressions, or are those, which, by their nature, refer to future events. Forward-looking information in this news release includes, without limitation, the statements regarding the ability to achieve the recoveries and the processing capacity of the mines; regulatory processes and permitting; estimates of gold or other minerals grades; anticipated costs, anticipated sales, project economics, the realization of expansion and construction activities and the timing thereof; production estimates and other statements that are not historical facts. Information concerning mineral resource/reserve estimates and the economic analysis thereof contained in the prefeasibility study are also forward-looking statements in that they reflect a prediction of the mineralization that would be encountered, and the results of mining it, if a mineral deposit

were developed and mined. Although West Kirkland believes that such timing and expenses as set out in this press release are reasonable, it can give no assurance that such expectations and estimates will prove to be correct. The Company cautions investors that any forward-looking information provided by the Company is not a guarantee of future results or performance, and that actual results may differ materially from those in forward-looking information as a result of various factors, including, but not limited to, the state of the financial markets for the Company's equity securities, the state of the market for gold or other minerals that may be produced generally, significant increases in any of the machinery, equipment or supplies required to develop and operate a mine, a significant change in the availability or cost of the labor force required to operate a mine, a significant increase in the cost of transportation for the Company's products, variations in the nature, quality and quantity of any mineral deposits that may be located, the Company's ability to obtain any necessary permits, consents or authorizations required for its activities, to raise the necessary capital or to be fully able to implement its business strategies and other risks associated with the exploration and development of mineral properties. The reader is referred to the Company's public filings for a more complete discussion of such risk factors and their potential effects which may be accessed through the Company's profile on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors Regarding the Use of Mining Terms

This press release has been prepared in accordance with the securities laws in effect in Canada, which differ from the requirements of U.S. securities laws. Unless otherwise indicated, all resources and reserve estimates included in this press release have been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101") and the Canadian Institute of Mining, Metallurgy, and Petroleum Definition Standards on Mineral Resources and Mineral Reserves. NI 43-101 is a rule developed by the Canadian Securities Administrators which establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Canadian standards, including NI 43-101, differ significantly from the requirements of the U.S. Securities and Exchange Commission (the "SEC") Industry Guide 7, and resource or reserve information contained herein may not be comparable to similar information disclosed by U.S. companies. In particular, and without limiting the generality of the foregoing, "resources" and "reserves" established under NI 43-101 standards may not qualify as "resources" and "reserves" under U.S. standards. Under U.S. standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. In addition, under U.S. standards, a "Final" or "Bankable" feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority. Disclosure of "contained ounces" in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute "reserves" by SEC standards as in-place tonnage and grade without reference to unit measures. Accordingly, information concerning mineral deposits set forth in this press release may not be comparable with information made public by companies that report in accordance with U.S. standards.
